

## NOT SINTERED PTFE TAPE

PTFE tape is used as a sealing element for threads. Resistant to heat and chemical solvents.

### FEATURES

The unsintered P.T.F.E tape is mainly used as a **sealing element for threads**. **Resistant to most of the known chemical compounds and solvents**, the PTFE tape can be used in a temperature range between  $-200^{\circ}\text{C}$  and  $+260^{\circ}\text{C}$ . It has a **low coefficient of friction and is odorless, tasteless and insoluble**. The tape is normally packaged in plastic reels. It consists of virgin PTFE resin and is obtained through a process called "**Paste Extrusion**".
